Student ICT

During my time as a full-time student ICT employee, I was responsible for configuring and installing new laptops and desktops for the employees. I also assisted in the upgrade and deployment of Windows 11 across the organization, this because of the end-of-life of Windows 10. In addition, I contributed to some network documentation and helped manage their IT inventory. Throughout the role, I ensured the correct handling and deployment of all IT equipment, supporting a smooth and secure IT environment.

't Westelhof

Student Restaurant Server

As a restaurant server, I managed customer orders, handled payments, and provided table service with a focus on delivering a positive guest experience. I worked efficiently under pressure, especially during busy peak hours, ensuring smooth service and customer satisfaction at all times.
